I. ACKNOWLEDGEMENTS

First of all, we would like to thank Mr. Nguyen Van Trong for helping us gain more knowledge, quick ways of doing things, the experiences that he has learned in the process of teaching and working. Thanks to these teaching methods, find out how to process and complete project implementation successfully. When implementing the SEM1 project which is also the first project we do, so the confusion and lack of experience to complete our work quickly is improbable. Fortunately, there are teachers who contribute, members of the accompanying group, and external documents, so the completion progress is also significantly faster.

Besides, we would like to thank Softech Aptech for providing an environment, study in a friendly, professional manner and important equipment in the project implementation process

Finally, we would like to thank everyone who helped us throughout the project. Although during the project implementation process, errors are inevitable, we hope that our project is recognized and evaluated in the most fairway.

Sincerely thank.

II. INTRODUCTION

Our project is to develop a website about the zoo, which provides all information about the animals and their images, besides the sale of tickets to the zoo and events held there.

Back in the day when going to the zoo or similar locations, if it were the first time, people did not know what there would be there, or the long queue to buy tickets missed your family's outing plan.

Although you can check out ads in newspapers, radio stations, TV ... or check out our promotional flyer it has many limitations such as limited quantities, can't be viewed anytime and anywhere if we need, and can't display all the information on it.

Understanding this, the CENTRAL Zoo website was launched to help people learn the key information before coming, as well as learning about the information of the animals that we have.

CENTRAL Zoo also allows you to purchase tickets online on the website, and pre-book events held by us at the zoo, saving you time for your trip that your family.

Understands the needs of operating a zoo, our team has developed the central zoo website design, supports CENTRAL zoo to advertise their brands and services widely on the internet. Help CENTRAL zoo develop further in the future.

III. REQUIREMENT

1. User

CENTRAL Zoo is created to serve 2 type of User:

- User who visit the website to buy ticket, see animal, commemorative phot or view information about wild animal.
- User who go to the zoo to travel and explore the zoo.

2. Hardware

- Pentium 166 or better
- 64 Megabytes of RAM or better

3. Software

- Notepad/ HTML editor
- Dreamweaver
- IE 5.0/ Netscape 6.0

4. Page

1. The Home Page should be created making use of Sections with a suitable logo.
2. The look and feel of the project must be made user friendly and uniformity in the color combination must be maintained.
3. About us, Contact Us (address and map) must be added, it's location displayed using GeoLocation API on the maps.
4. Animal's information can be added in the categorized like birds, animals, water animals, and so on.
5. Safari option is there for which dummy booking option can be added.

6. Gallery of animals and birds must be added in the website.
 7. Timings of the zoo must be added.
 8. Navigation of the project must be made smooth.
 9. Events organized (Informative for audience and for the welfare of the animals) must be noted.
 10. Feedback and query can be added in the website.
11. Page:
- Home
 - Gallery
 - Library Photo
 - Commemorative Photo
 - Animal Detail
 - Ticket
 - Event
 - About
 - Contact

IV. PROBLEM DEFINITION

1. Homepage

This is the page where the user will be navigated after accessing the website successfully. On this page, we have introduced our zoo. The current status of endangered animals and the hunting of rare and precious animals in particular, and wildlife, in general, all over the world. We also suggested some solutions to protect wild animals. Display pictures and information about animals. Allow site visitors to navigate directly to image gallery pages, buy tickets and view upcoming events in the central zoo. Some customers' feedbacks after experiencing our zoo.

2. Gallery

The gallery includes 4 items:

- ***Library Photo***

Gallery representing pictures of animals raised and preserved in the central zoo and some details about them. Display the number of animals in the central zoo.

- ***Commemorative Photo***

An archive of photos commemorating the souvenirs of visitors in the central zoo.

- ***Animal Details***

Photo and detailed information about distributed animals: terrestrial animals, aquatic animals, flying animals.

3. Ticket

Ticket include two categories:

- ***Zoo Timing***

Zoo time programs on the opening day of the Central Zoo.

Information about the parking and the way to access the central zoo by different vehicles.

- ***Ticket***

This website allows you to buy tickets online at different prices for children, adults, the elderly, pairs, groups, and in groups with friends, you can also buy Central Zoo membership ticket.

4. Event

When users want to preview upcoming events in the central zoo, they can click 'Events'. Here, users can also book events in advance by registering via the form or contacting us via the phone number displayed on the website.

After clicking the "Event" category, the user will see details about the Event such as photos, time, number of people who can attend and quick booking.

5. About

This page introduces the history, mission, vision, and core values of CENTRAL Zoo.

Information about the management of the CENTRAL zoo.

6. Contact

This page displays our address, email, phone number, and Social Network.

Display a form for you to fill out and provide us with your feedback.

Display map using Geolocation API.

7. Navigation Bar

There is a logo of CENTRAL Zoo you can click to go to the homepage.

There are links to navigate to other pages of CENTRAL Zoo.

Gallery and Ticket use dropdown menus to drop down other links.

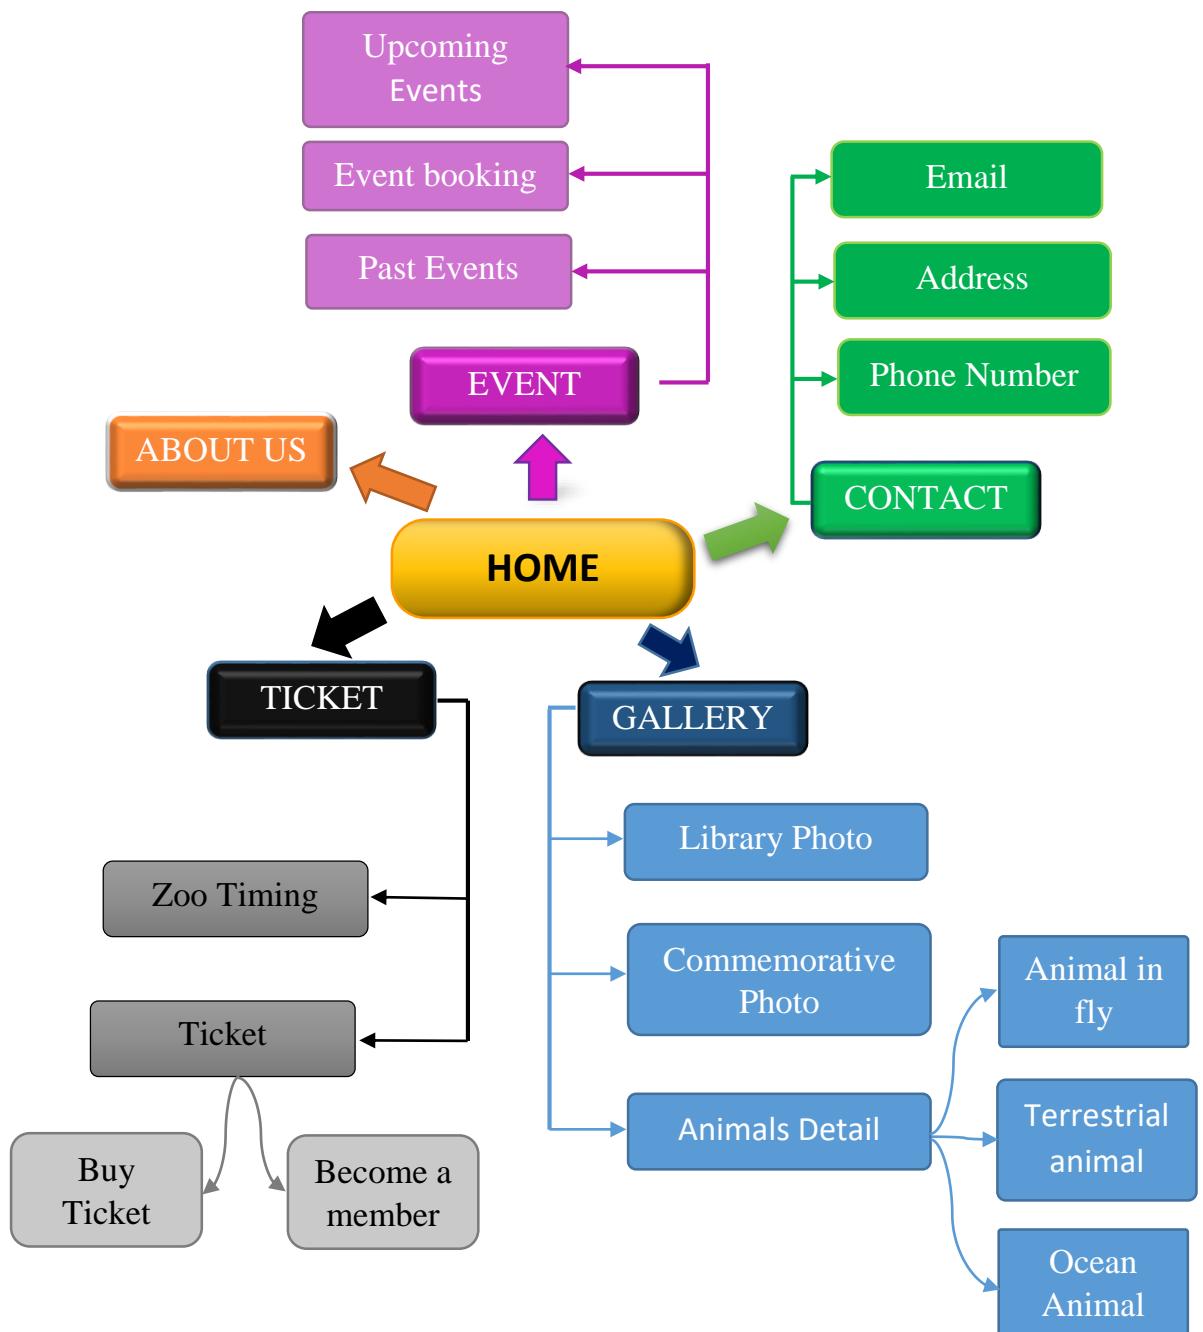

8. Footer

There are links to CENTRAL Zoo's social networking sites such as Facebook, Twitter, Google Plus, Youtube, Instagram.

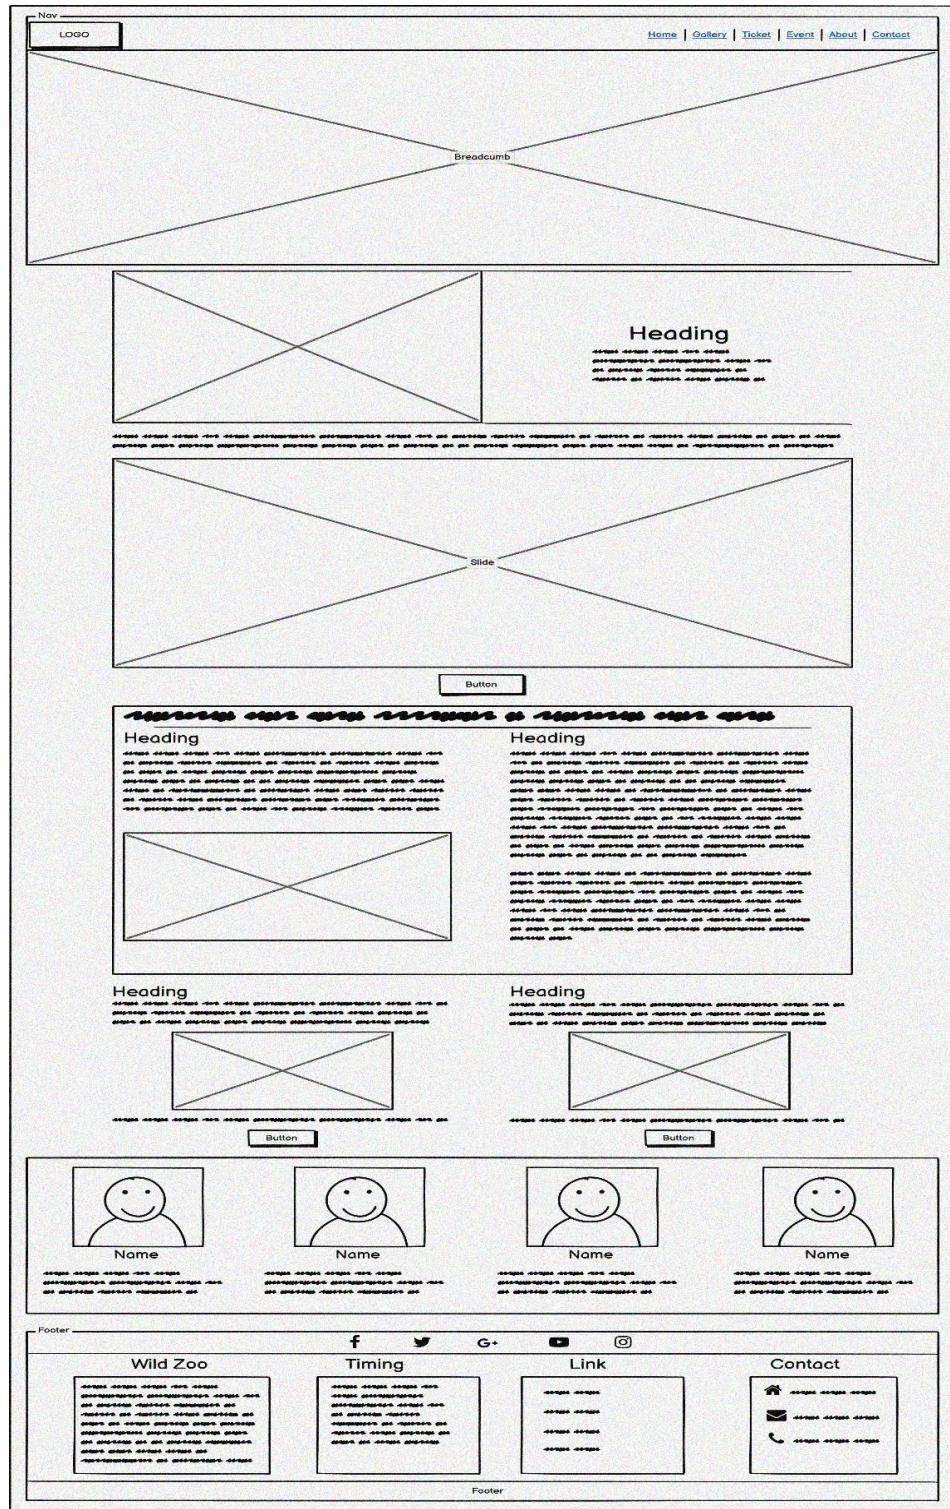

Display mission, opening hours, address, phone number, email ...of the Central Zoo.

There are quick links to Home, Ticket, About, Contact if the user pulls the end of websites.

VII. GUI OF WEBSITE

WELCOME TO OUR ZOO

Home Gallery Ticket Event About Contact

At our zoo, animals are most thoughtfully nurtured, open regularly for tourists to visit and check in.

THE REASON WE OPENED THE ZOO AND OUR FEEL AFTER OPENING

- ▲ The current reality of animals.
- 1/2 of wildlife populations have declined since 1970.
- Domestic violence to reduce and go to extinction.
- 1/2 species of mammals based on danger of extinction.
- The extinction of hunting for new species is a concern.
- ...

Some solution to protecting the wild animals

- Education. If you don't know enough to play, donate your time. Every organization needs more volunteers. Even the most basic knowledge, research will enhance their skills.
- Encourage. Now you start your local conservation areas and nature reserves, pay the necessary entry fees. Your donations will help maintain these vital conservation areas.
- Encourage. Find new ways to use things you already own. If you don't recycle, start.
- Educate. Whether you're into recycling natural habitats or preserving wildlife trafficking. Find the organization that appeals to your passions and get involved. Become a member. Stay informed.大力支持 the organization of your choice.

TICKET

Buy tickets to a zoo park, season (days about 5 - 15).

EVENT

See how many events going forward to help save people from our wildlife.

GENERAL ZOO

Wildlife habitats are being destroyed. Many species of animals are becoming extinct. This is a serious problem.

It's never too late to make a difference. As individuals, little actions not only contribute directly to the conservation of animals, but also has symbolic meaning, drawing the support for the conservation of all other wildlife.

WILD ANIMAL

Wildlife terminology refers to undocumented animal species that are rare to extinct; all remaining individuals of a species that are free without being introduced by humans. Wildlife can be found in its ecosystems, forests, mountains, plains, grasslands, and other areas, including the more developed urban areas, all have designated zones of wildlife.

INTERESTING THINGS ABOUT ANIMALS

Shark	Starling	Cheetah	Jellyfish
A shark can swim up to 4000 beats in the minute. The heart on predators has many more beats than the vertebrate one of us.	There are many breeds of mammals like bats that fly around in folds covering the same way as humans. If your life is too dull, then there is definitely one for you.	Cheetah is a fastest species in the world with a speed that can reach 110 km/h. They can run up to 60 seconds.	It's largest is a giant jellyfish named the lion's mane. In total, they have tentacles up to 10m, mouthparts up to 10cm, mouthparts, swimming up to 10m in length.

IN MY ANIMAL PARK

More than 500 species	Nearly 1500 individuals	About 200 animals are presented

[HOME](#) / [Animal detail](#)

Terrestrial animals

[Elephant](#)

The African elephant is a living or fossil species of elephant, currently the largest land-living animal. Elephants have been domesticated by humans for thousands of years, and are often used for labor and transport. They are also used for entertainment, such as in circuses and zoos.

[Rhino](#)

The rhinoceros is the last surviving member of the family Rhinocerotidae. There are five extant species of rhinoceros: the Indian rhinoceros, the Javan rhinoceros, the Sumatran rhinoceros, the white rhinoceros, and the black rhinoceros.

[Horse](#)

The horse is a domesticated animal. The domestic horse, Equus caballus, has several subspecies, including the Przewalski's horse, which is the last remaining wild horse species.

[Lion](#)

The lion is a large cat native to Africa and a small number of Asian countries. It is the second largest cat after the tiger. Lions are known for their distinctive manes and are often kept as pets.

[Snake](#)

A snake is a legless lizard that is found in a variety of environments, including deserts, forests, and grasslands. Snakes are often considered to be dangerous because they can bite.

[Monkey](#)

Monkeys are a diverse group of primates, including apes, gibbons, and lemurs. They are found in a variety of habitats, including forests, deserts, and mountains.

[Panda](#)

The giant panda is a bear that is native to China. It is a symbol of peace and is often used in international relations. Pandas are known for their black and white fur and their large, round bodies.

Animal in fly

[Eagle's Nest-Cave](#)

The eagle is a large bird of prey in the Order of the Falconidae. They are found in a variety of environments, including deserts, forests, and mountains. Eagles are known for their strength and power, and are often used in hunting and trapping.

[Cormorant](#)

Cormorants are birds that are found in a variety of environments, including deserts, forests, and mountains. They are known for their long necks and long legs.

[Owl](#)

The owl is a bird of prey that is found in a variety of environments, including deserts, forests, and mountains. Owls are known for their large eyes and sharp talons.

[Parrot](#)

Parrots are birds that are found in a variety of environments, including deserts, forests, and mountains. They are known for their colorful feathers and their ability to mimic human speech.

[Flamingo](#)

Flamingos are birds that are found in a variety of environments, including deserts, forests, and mountains. They are known for their pink feathers and their long legs.

[Seagull](#)

The seagull is a large bird of prey that is found in a variety of environments, including deserts, forests, and mountains. Seagulls are known for their long wings and their ability to fly long distances.

Ocean Animal

[Dolphin](#)

Dolphins are marine mammals that are found in a variety of environments, including deserts, forests, and mountains. They are known for their intelligence and their ability to communicate with each other.

[Turtle](#)

Turtles are marine mammals that are found in a variety of environments, including deserts, forests, and mountains. They are known for their long lives and their ability to adapt to different environments.

[Whale](#)

Whales are marine mammals that are found in a variety of environments, including deserts, forests, and mountains. They are known for their size and their ability to migrate long distances.

[Penguin](#)

Penguins are marine mammals that are found in a variety of environments, including deserts, forests, and mountains. They are known for their black and white plumage and their ability to swim well.

[Seahorse](#)

Seahorses are marine mammals that are found in a variety of environments, including deserts, forests, and mountains. They are known for their unique shape and their ability to change color.

HOME / About us

What are you looking for?

Download free 5 miles to the south of Bristol.

The zoo was founded by Anthony and Christiane Bach, who have lived and worked here together as dairy farmers since 1995 when the original Moat House Farm was part of the Sydenham Estate. The couple first opened Wild Zoo Farm visitor centre in 2000 and it quickly became a favourite day out for visitors. In all of the years at Wild Zoo Farm we've taken photos since given so many awards-winning zoo and one of the most popular visitor attractions in Somerset.

Opening for its first season as Wild Zoo Centre in 1999, visitors were able to get hands-on with bottle-feeding lambs and getting up close to both farm animals and exotic animals such as llamas, camels and wallabies. Tractor rides and playing in the hay barn were popular activities as they still are today. Now the zoo welcomes over 200,000 visitors a year and has an exciting, large animal collection of over one hundred species which includes African elephants, giraffes, lions, a tiger, rhinos and spotted hyenas. The original hands-on approach has continued and today visitors enjoy close encounters with some amazing animals.

XII. CONCLUSION

CENTRAL Zoo includes Homepage, Gallery, Ticket, Event, About, Contact.

However, this website also needs to be developed and upgraded.

Here is the direction of development:

- ✓ Complete the missing parts of the website.
- ✓ Mobile App Development.
- ✓ Build chat box for customer support.
- ✓ Create profiles to store user data.
- ✓ Build Back-end for the website.
- ✓ Upgrade static web to dynamic web using Java, C #, PHP, Ruby ...
- ✓ ...
